

# NETcon

## LINE MECHANIC

NETcon are looking for a Line Mechanic to join the Overhead Lines Team.

As a Line Mechanic, you will be responsible for providing line maintenance, line construction and line fault repair services.

### What's involved:

- Install replace and maintain overhead electricity distribution equipment, poles and pole mounted equipment, i.e. transformers, fuses, switches, circuit breakers, conductors, insulators, terminations and connections etc.
- Compliance and commissioning tests to ensure electrical integrity, faults location and safety.
- Be a positive role model of health and safety practices.
- Support other field staff and the wider organisations team members, creating a positive culture, sharing information, knowledge and expertise.
- Perform network switching, when authorised.
- Perform 24/7 fault response service including location, diagnosis, and repair duties, when authorised.

### We will be looking for someone who is:

- EWRB Registered Level 4 Line Mechanic with a current practicing license.
- Experienced in the electrical distribution industry.
- Live line, glove & barrier qualifications and experience would be great.
- Eligible to work in New Zealand, with New Zealand citizenship or New Zealand permanent residency.
- Current NZ Drivers License, Class 4 preferred (minimum Class 2).

***If this sounds like you or someone you might know, get a CV and cover letter to [hr@netcon.co.nz](mailto:hr@netcon.co.nz) as soon as possible. All applications will be treated as confidential. You can also talk to Tony Potts if you would like to know more about this position.***
